Why Poor Sleep Sabotages Weight Loss

- • Lack of deep sleep disrupts metabolism and fat-burning.
- • Hormonal imbalance increases appetite & cravings.
- • Stress raises cortisol → more belly fat.

Why Most Diets & Supplements Fail

- • Focus only on weight loss or sleep, not both.
- • Temporary results, don’t address root causes.
- • Need for restorative sleep to naturally support metabolism.

SleepLean: Nighttime Fat Burner & Sleep Aid

- • Supports deep N-REM sleep.
- • Boosts metabolism while you rest.
- • Natural ingredients targeting fat storage and hormones.
